Rescue California-Recall Governor Gavin Newsom
PO Box 417030
Sacramento, CA 95841
Orrin Heatlie, Lead Proponent

Dear Mr. Heatlie:

Stop the Steal California is a citizen-led effort, independent from political party politics. We contend that a recall election is expensive and unnecessary, especially in light of an election already set mere months away.

We hope that we can all agree that California government only works when there is full transparency in accordance with our Constitution and the Right to Access Public Information and Meetings Constitutional Amendment of 2004. To that end and in the interest of full public access, we are requesting that your committee immediately release copies of all the recall petitions you have submitted to the County Registrars and Secretary of State.

Our committee will pay for the cost of making copies. We are prepared to move forward with legal action seeking transparency and disclosure if the copies of the petitions are not made available.

We hope you will take this as a good faith effort to resolve this matter without any further action by our committee; however, our resolve to assure public access is absolute.

Should you fail to act, we will proceed with further legal remedies. We are willing to discuss this matter but please understand that we will settle for nothing short of immediate release of all the petitions.

Sincerely,

Don Perata, Chair

State Senate Pro Tem Emeritus
